FROM: Lawrence F. Boehm

SUBJECT: Request for Waiver of 300 Foot Setback From a Stream - Lehrer Landfill

Attached is a letter from James Lehrer of Lehrer Sanitary Landfill (license number 73) requesting that the 300 foot setback requirement from a navigable stream be waived. The landfill is located on a hillside sloping gently toward Kankapot Creek. The present operating area is about 100 feet from the creek.

A June 15, 1973 inspection of the site revealed several areas where leachates are entering the creek. Mr. Lehrer was notified to seal off the leachate areas with clay and discontinue all disposal operations within 300 feet of the creek.

It is our opinion that the leachate problem will continually reoccur as long as disposal operations are continued within 300 feet of the creek. Therefore this office is requesting that the waiver request be denied.
